

Landscape Evolution

Karst Landscapes

What rocks form karst landscapes?

Transport - processes

- Water

Weathering

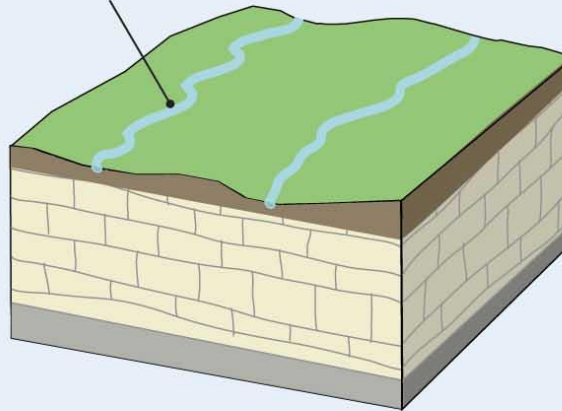

- Mechanical weathering
- Chemical weathering
- Biological weathering

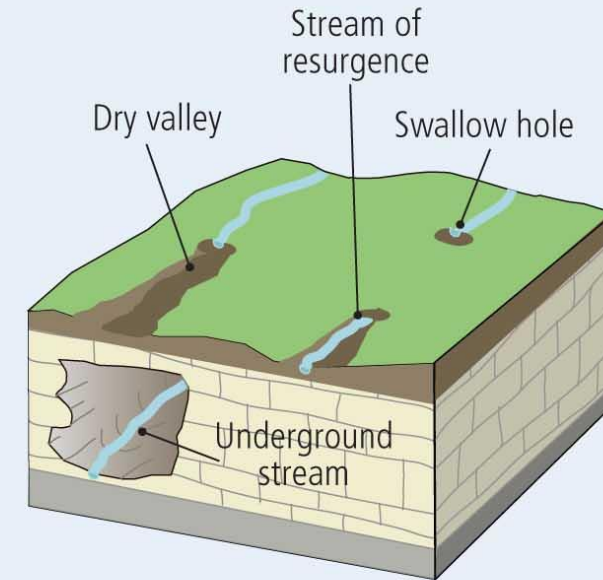

How do karst landscapes form?

Fig 9.9(a) Youthful stage

Normal surface drainage

Early youthful stage

Late youthful stage

Fig 9.9(b) Mature stage

Roof has collapsed

Surface hollow

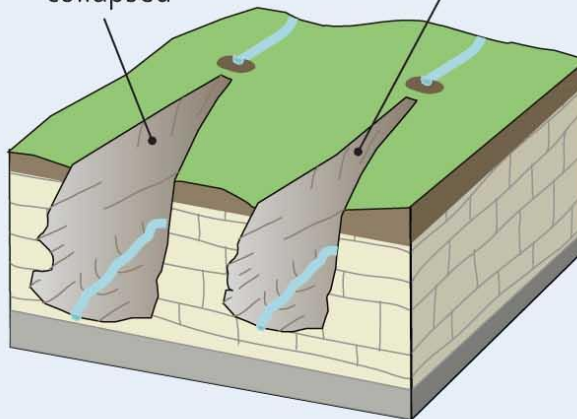

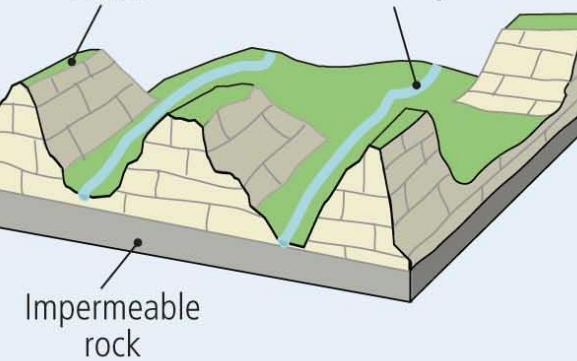

Fig 9.9(c) Old age stage

Hums

Surface drainage

Young Landscape

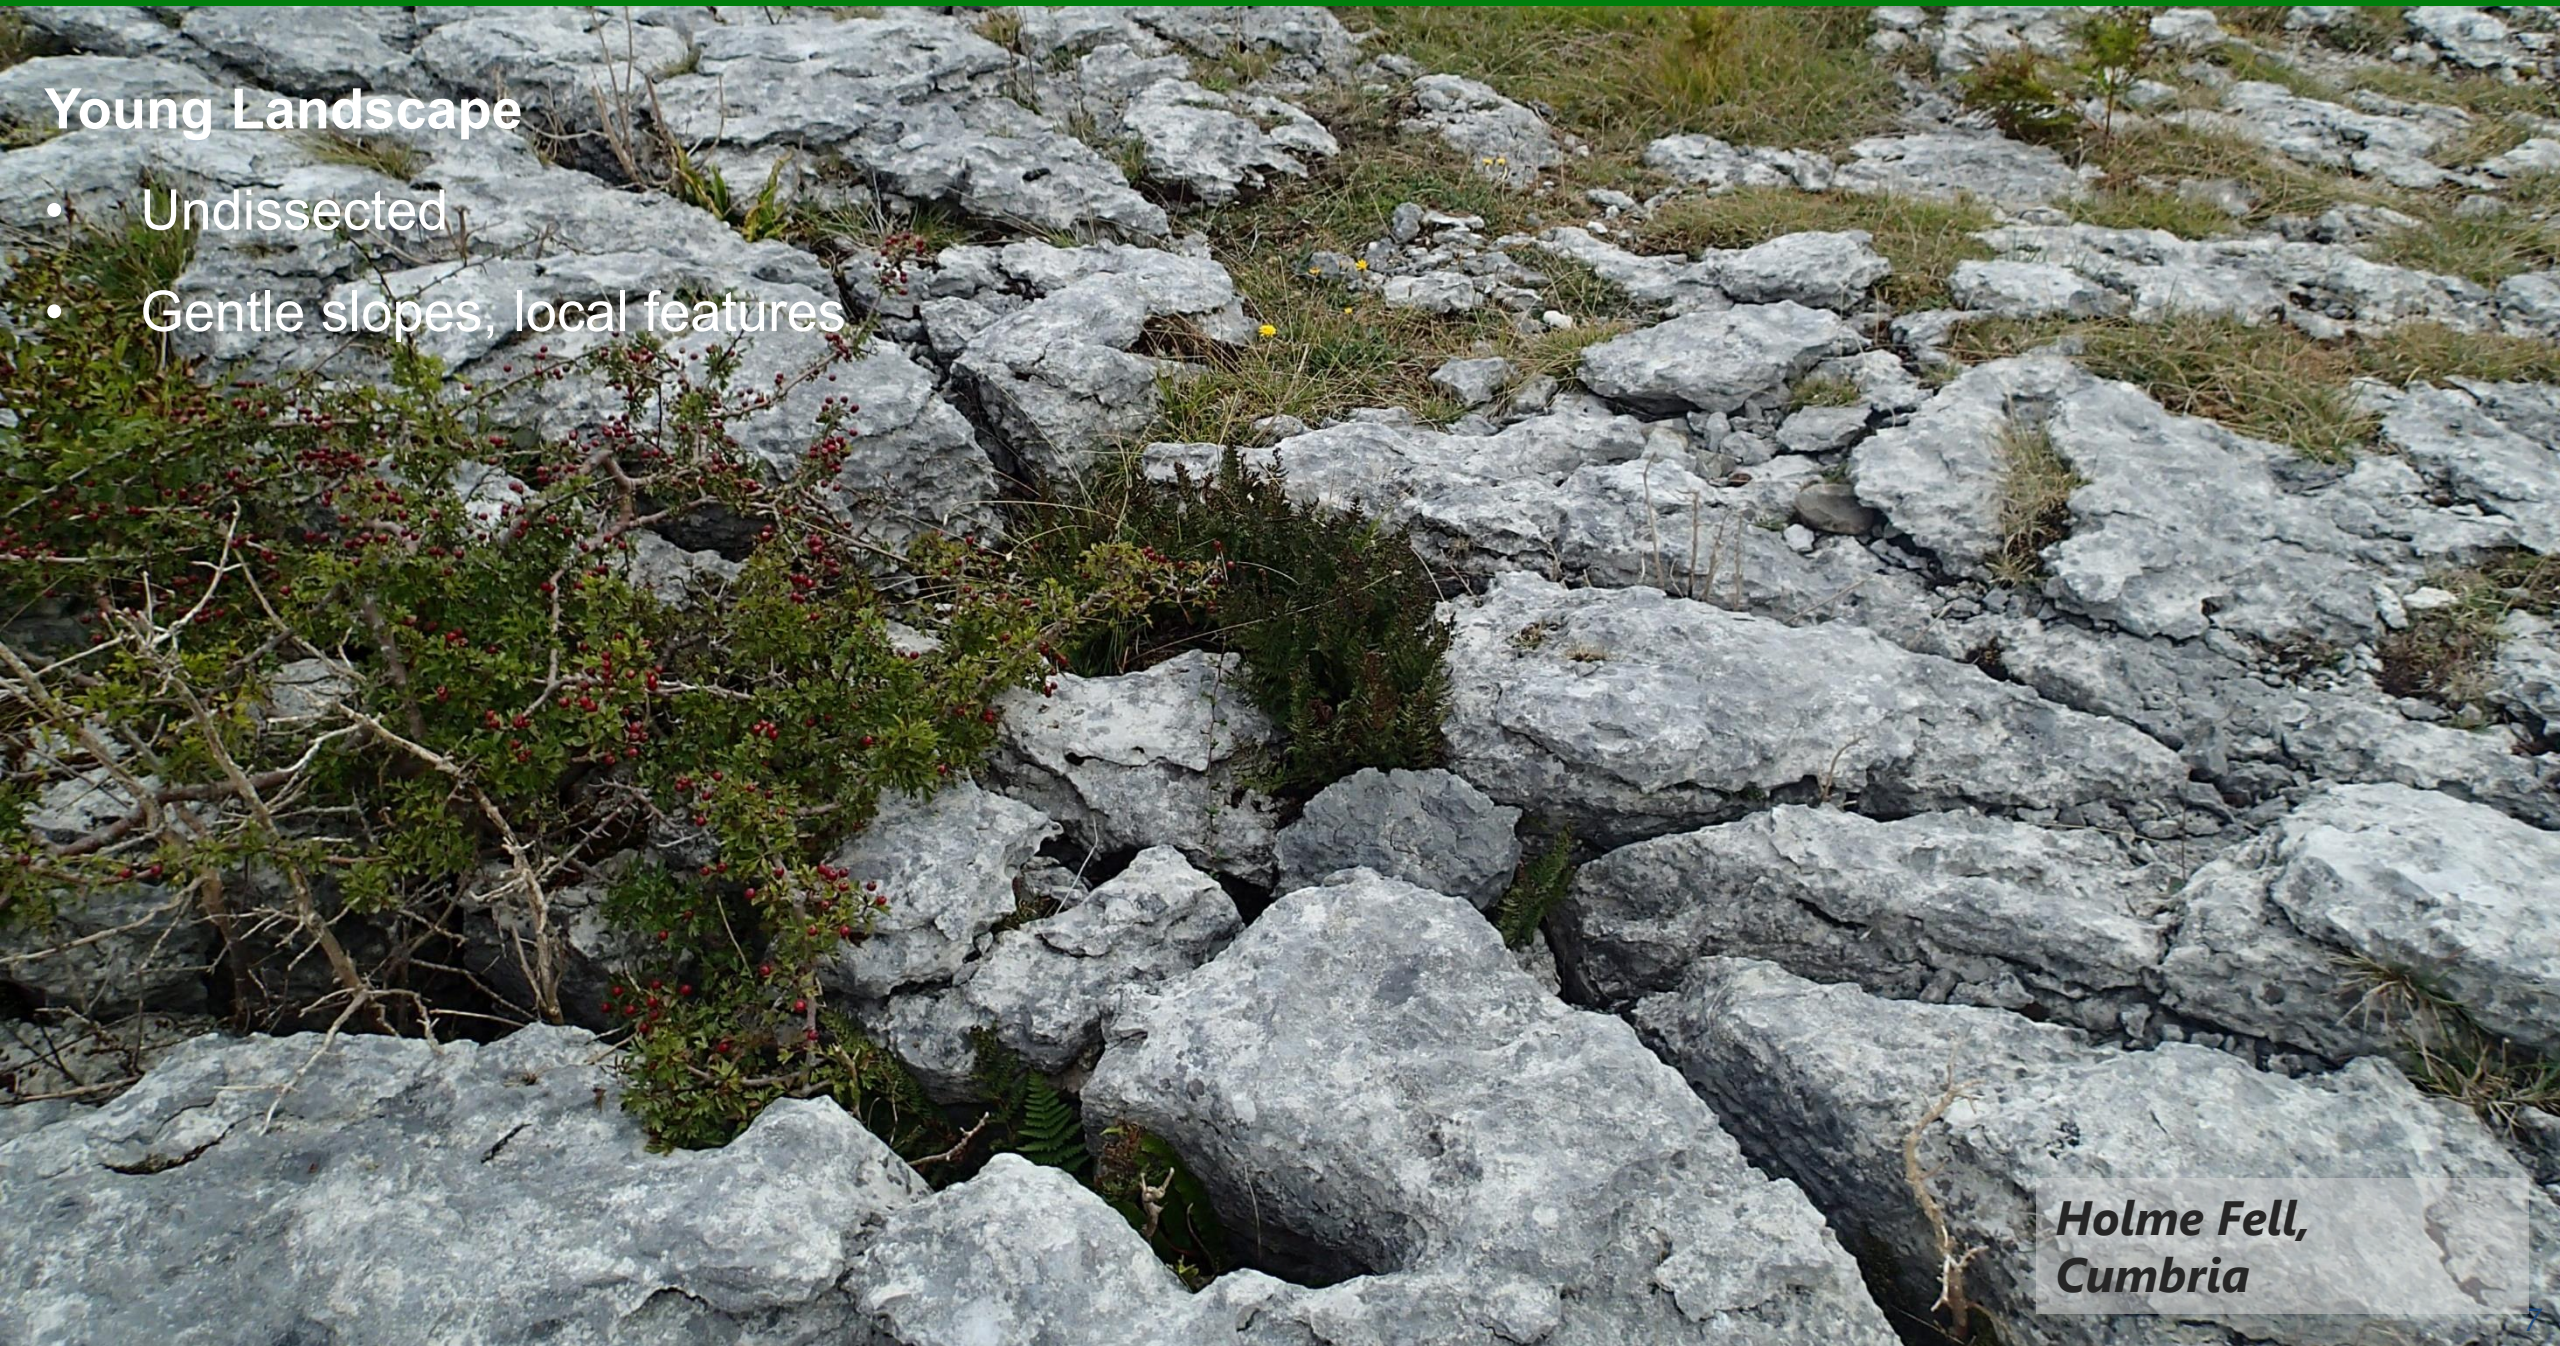

- Undissected
- Gentle slopes, local features

The Burren, Clare

Young Landscape

- Undissected
- Gentle slopes, local features

*Holme Fell,
Cumbria*

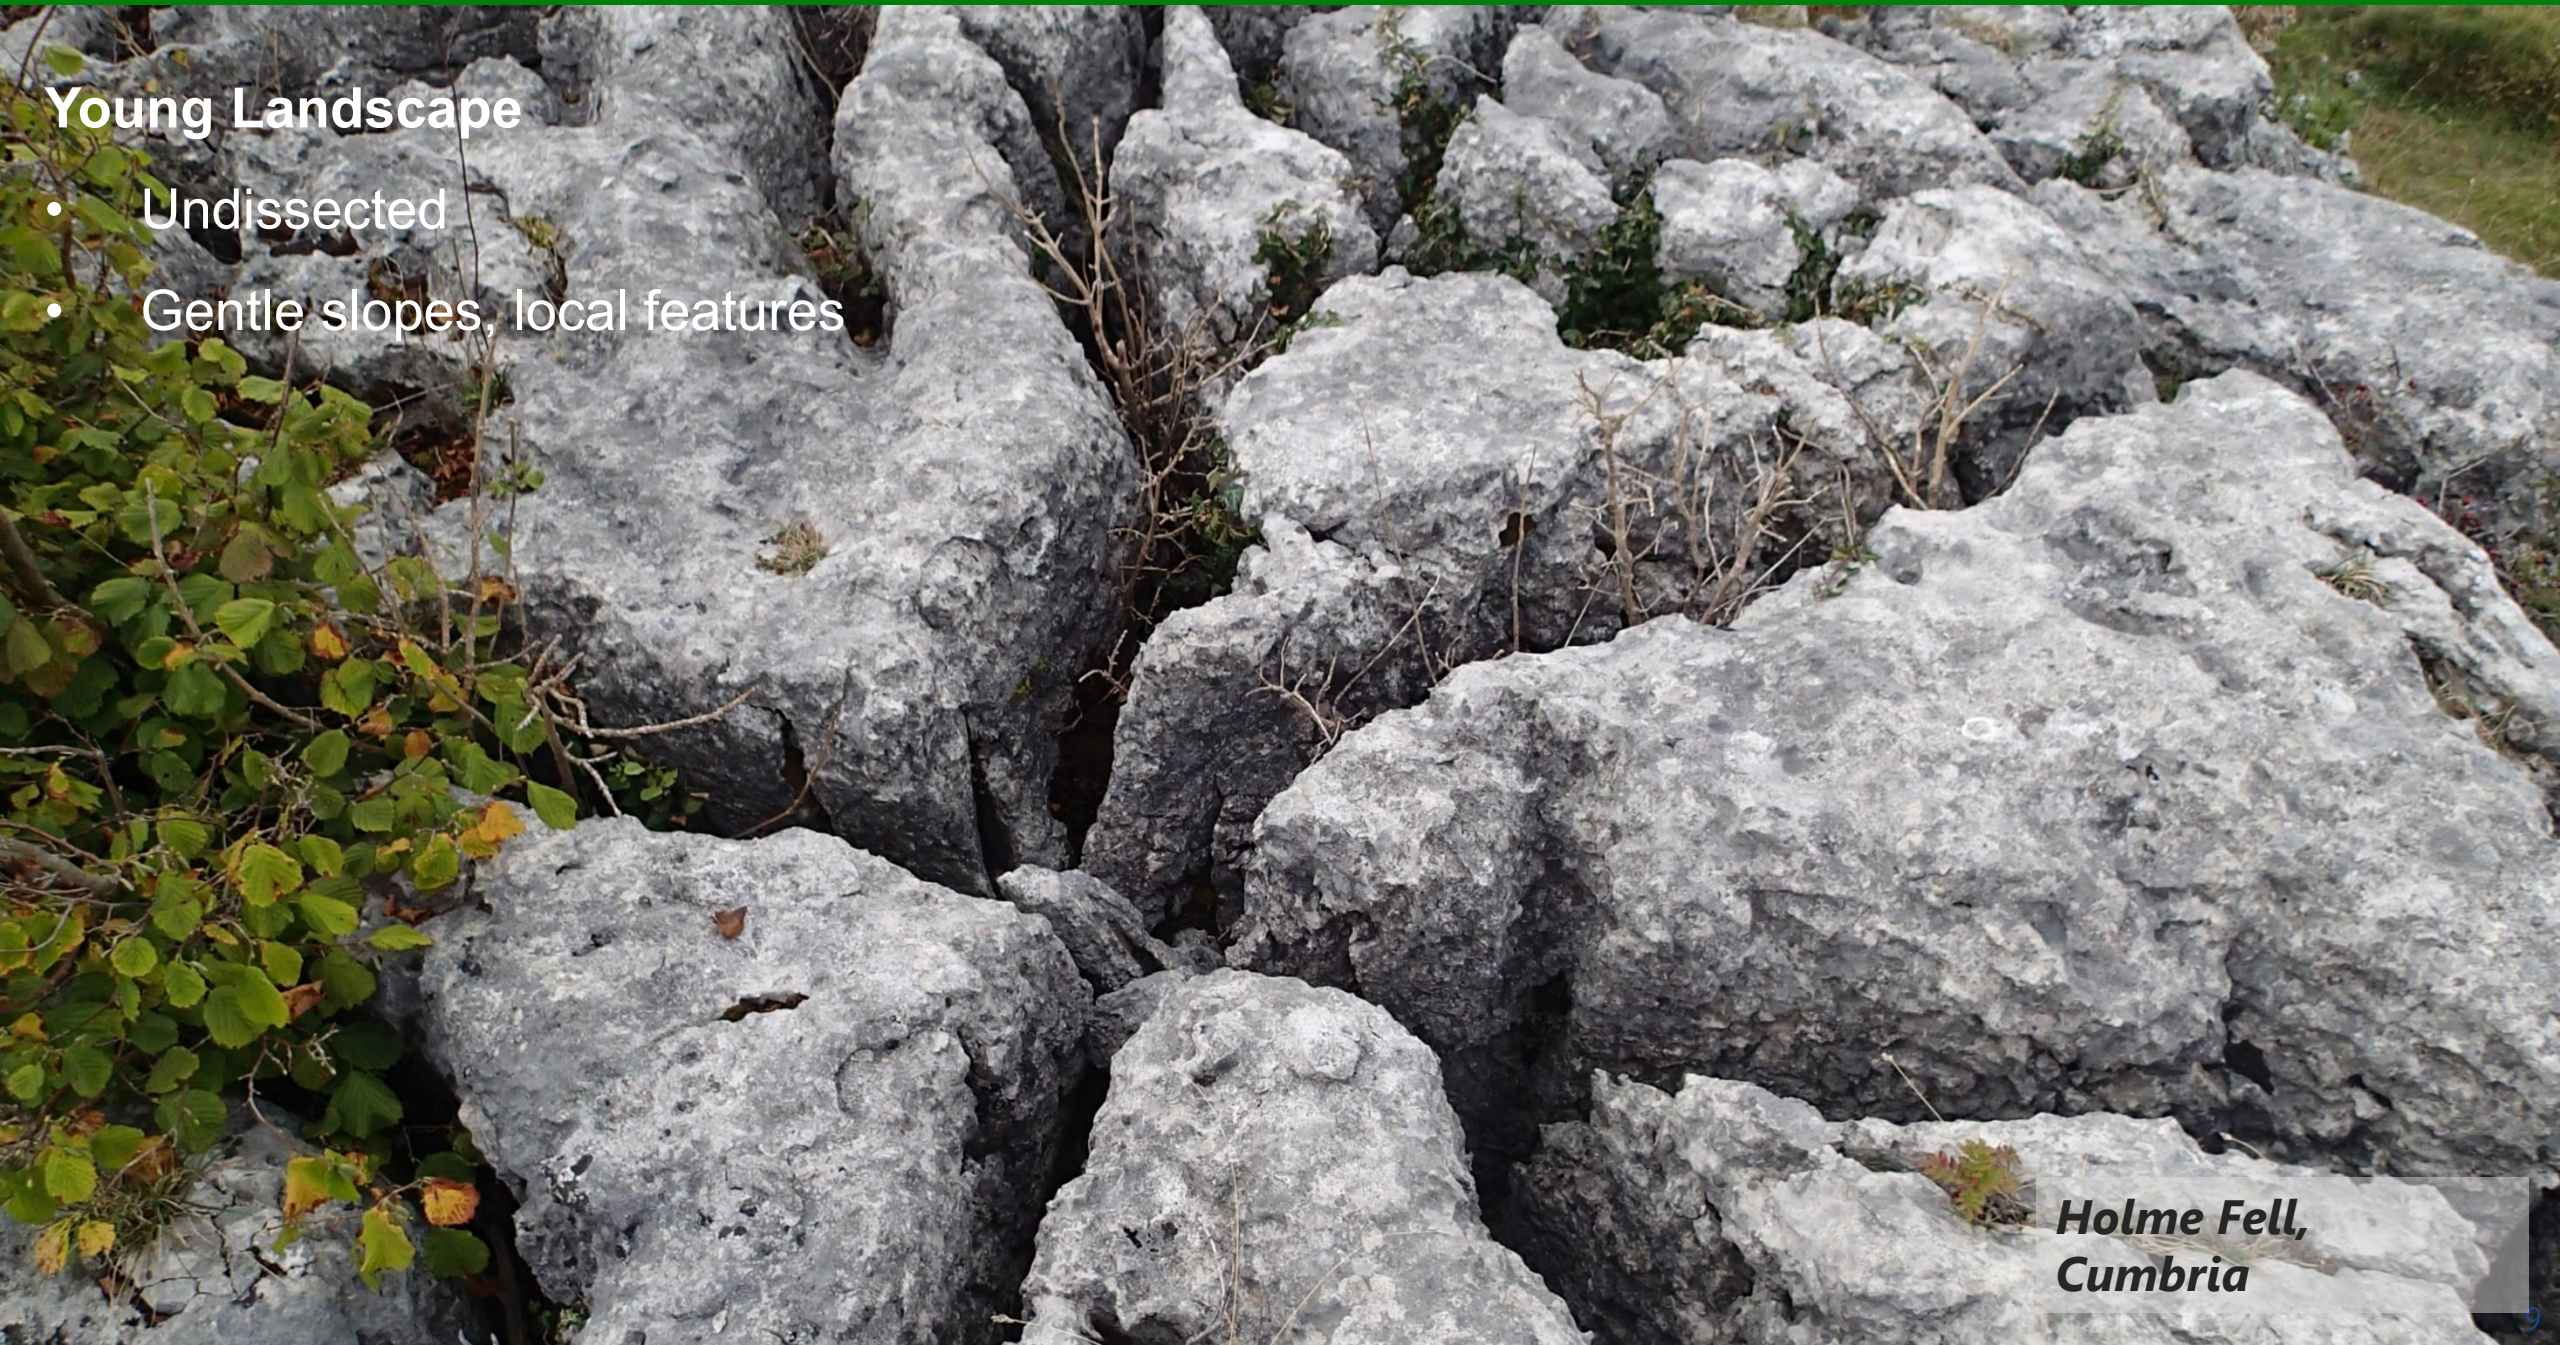

Young Landscape

- Undissected
- Gentle slopes, local features

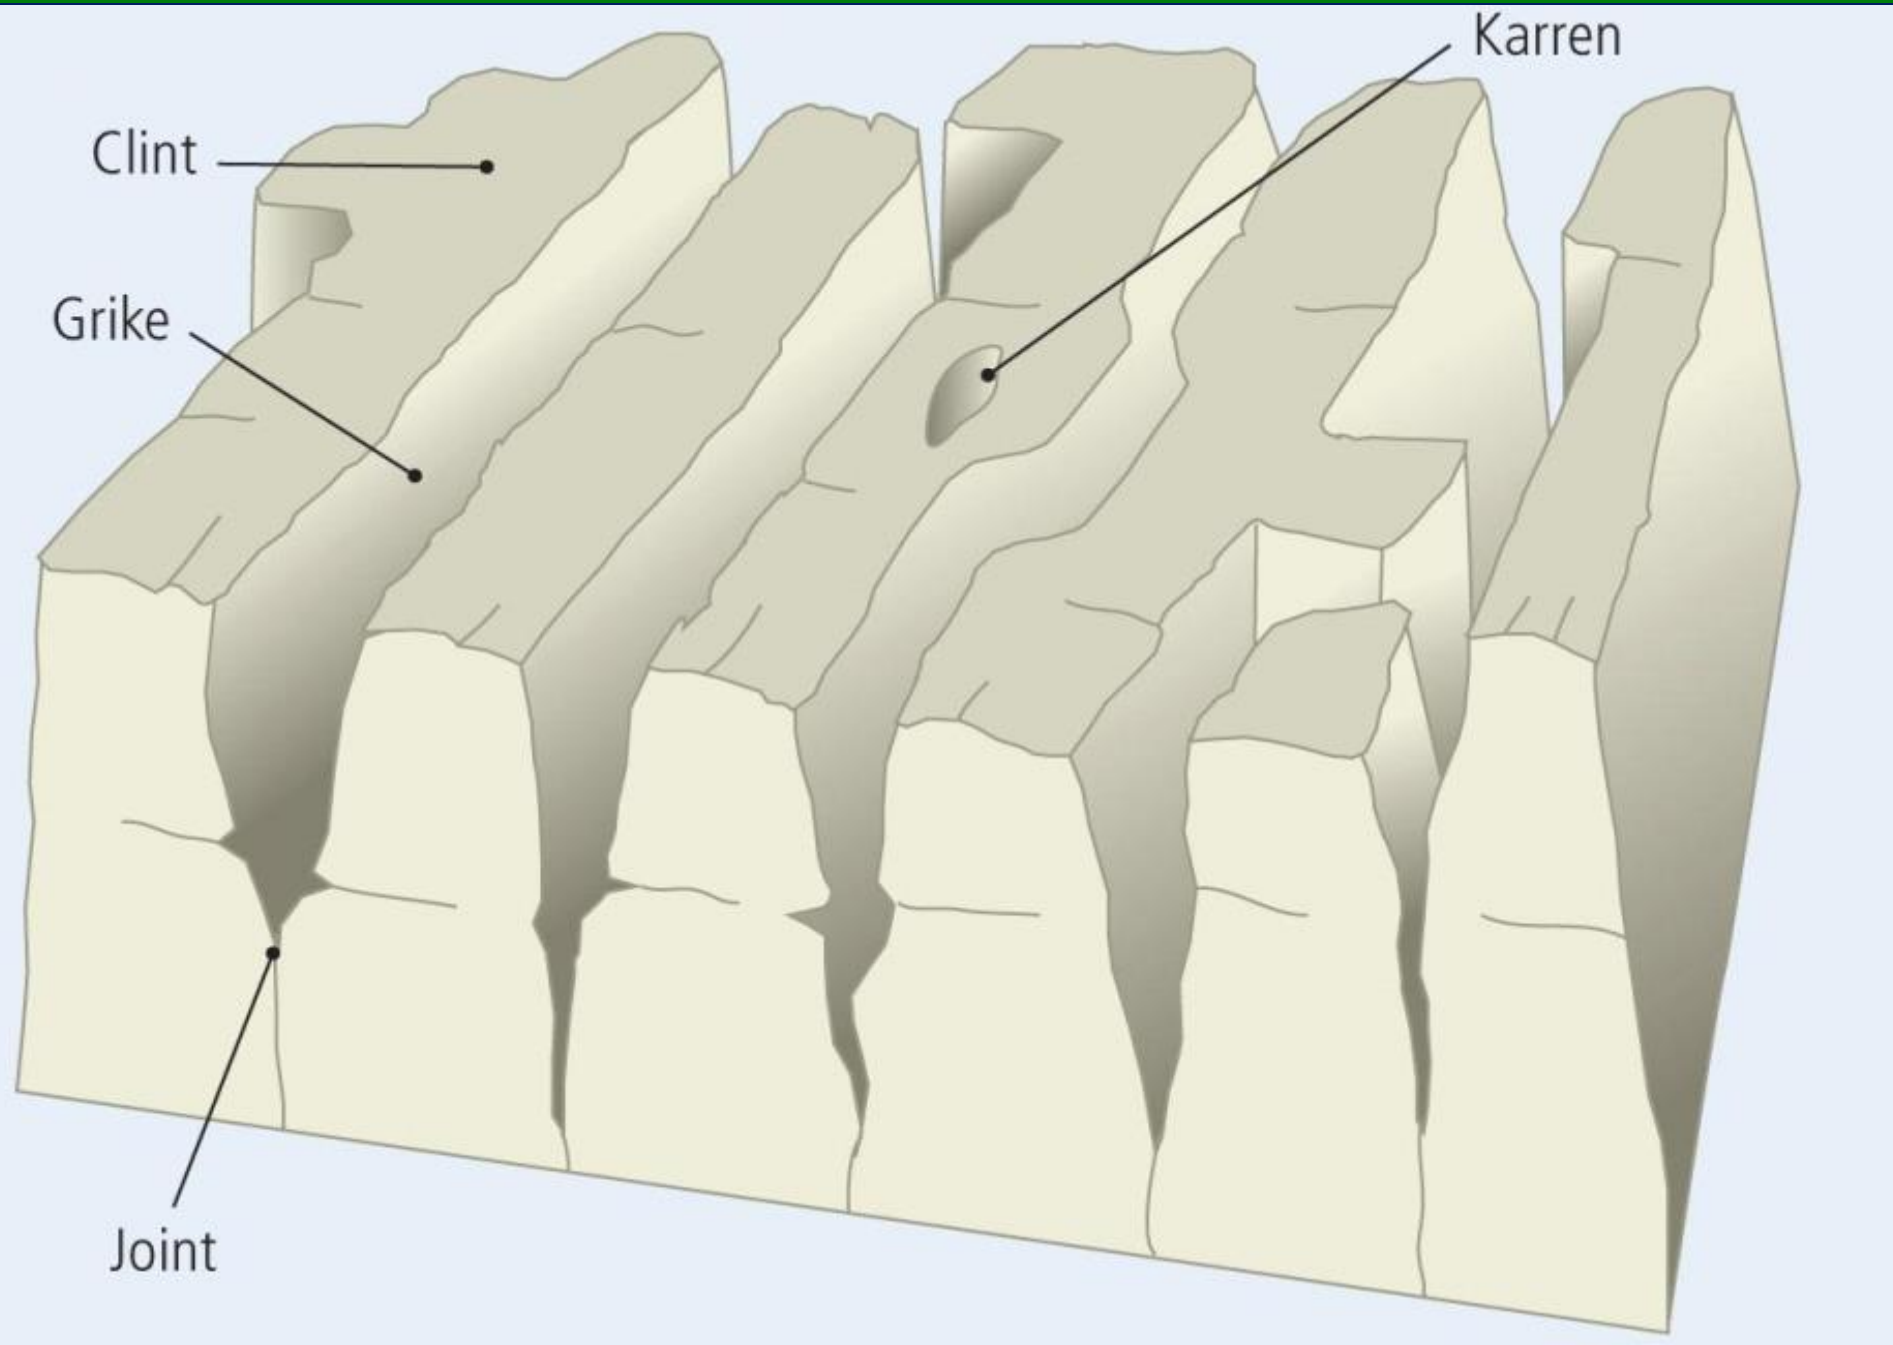

***Holme Fell,
Cumbria***

Young Landscape

- Undissected
- Gentle slopes, local features

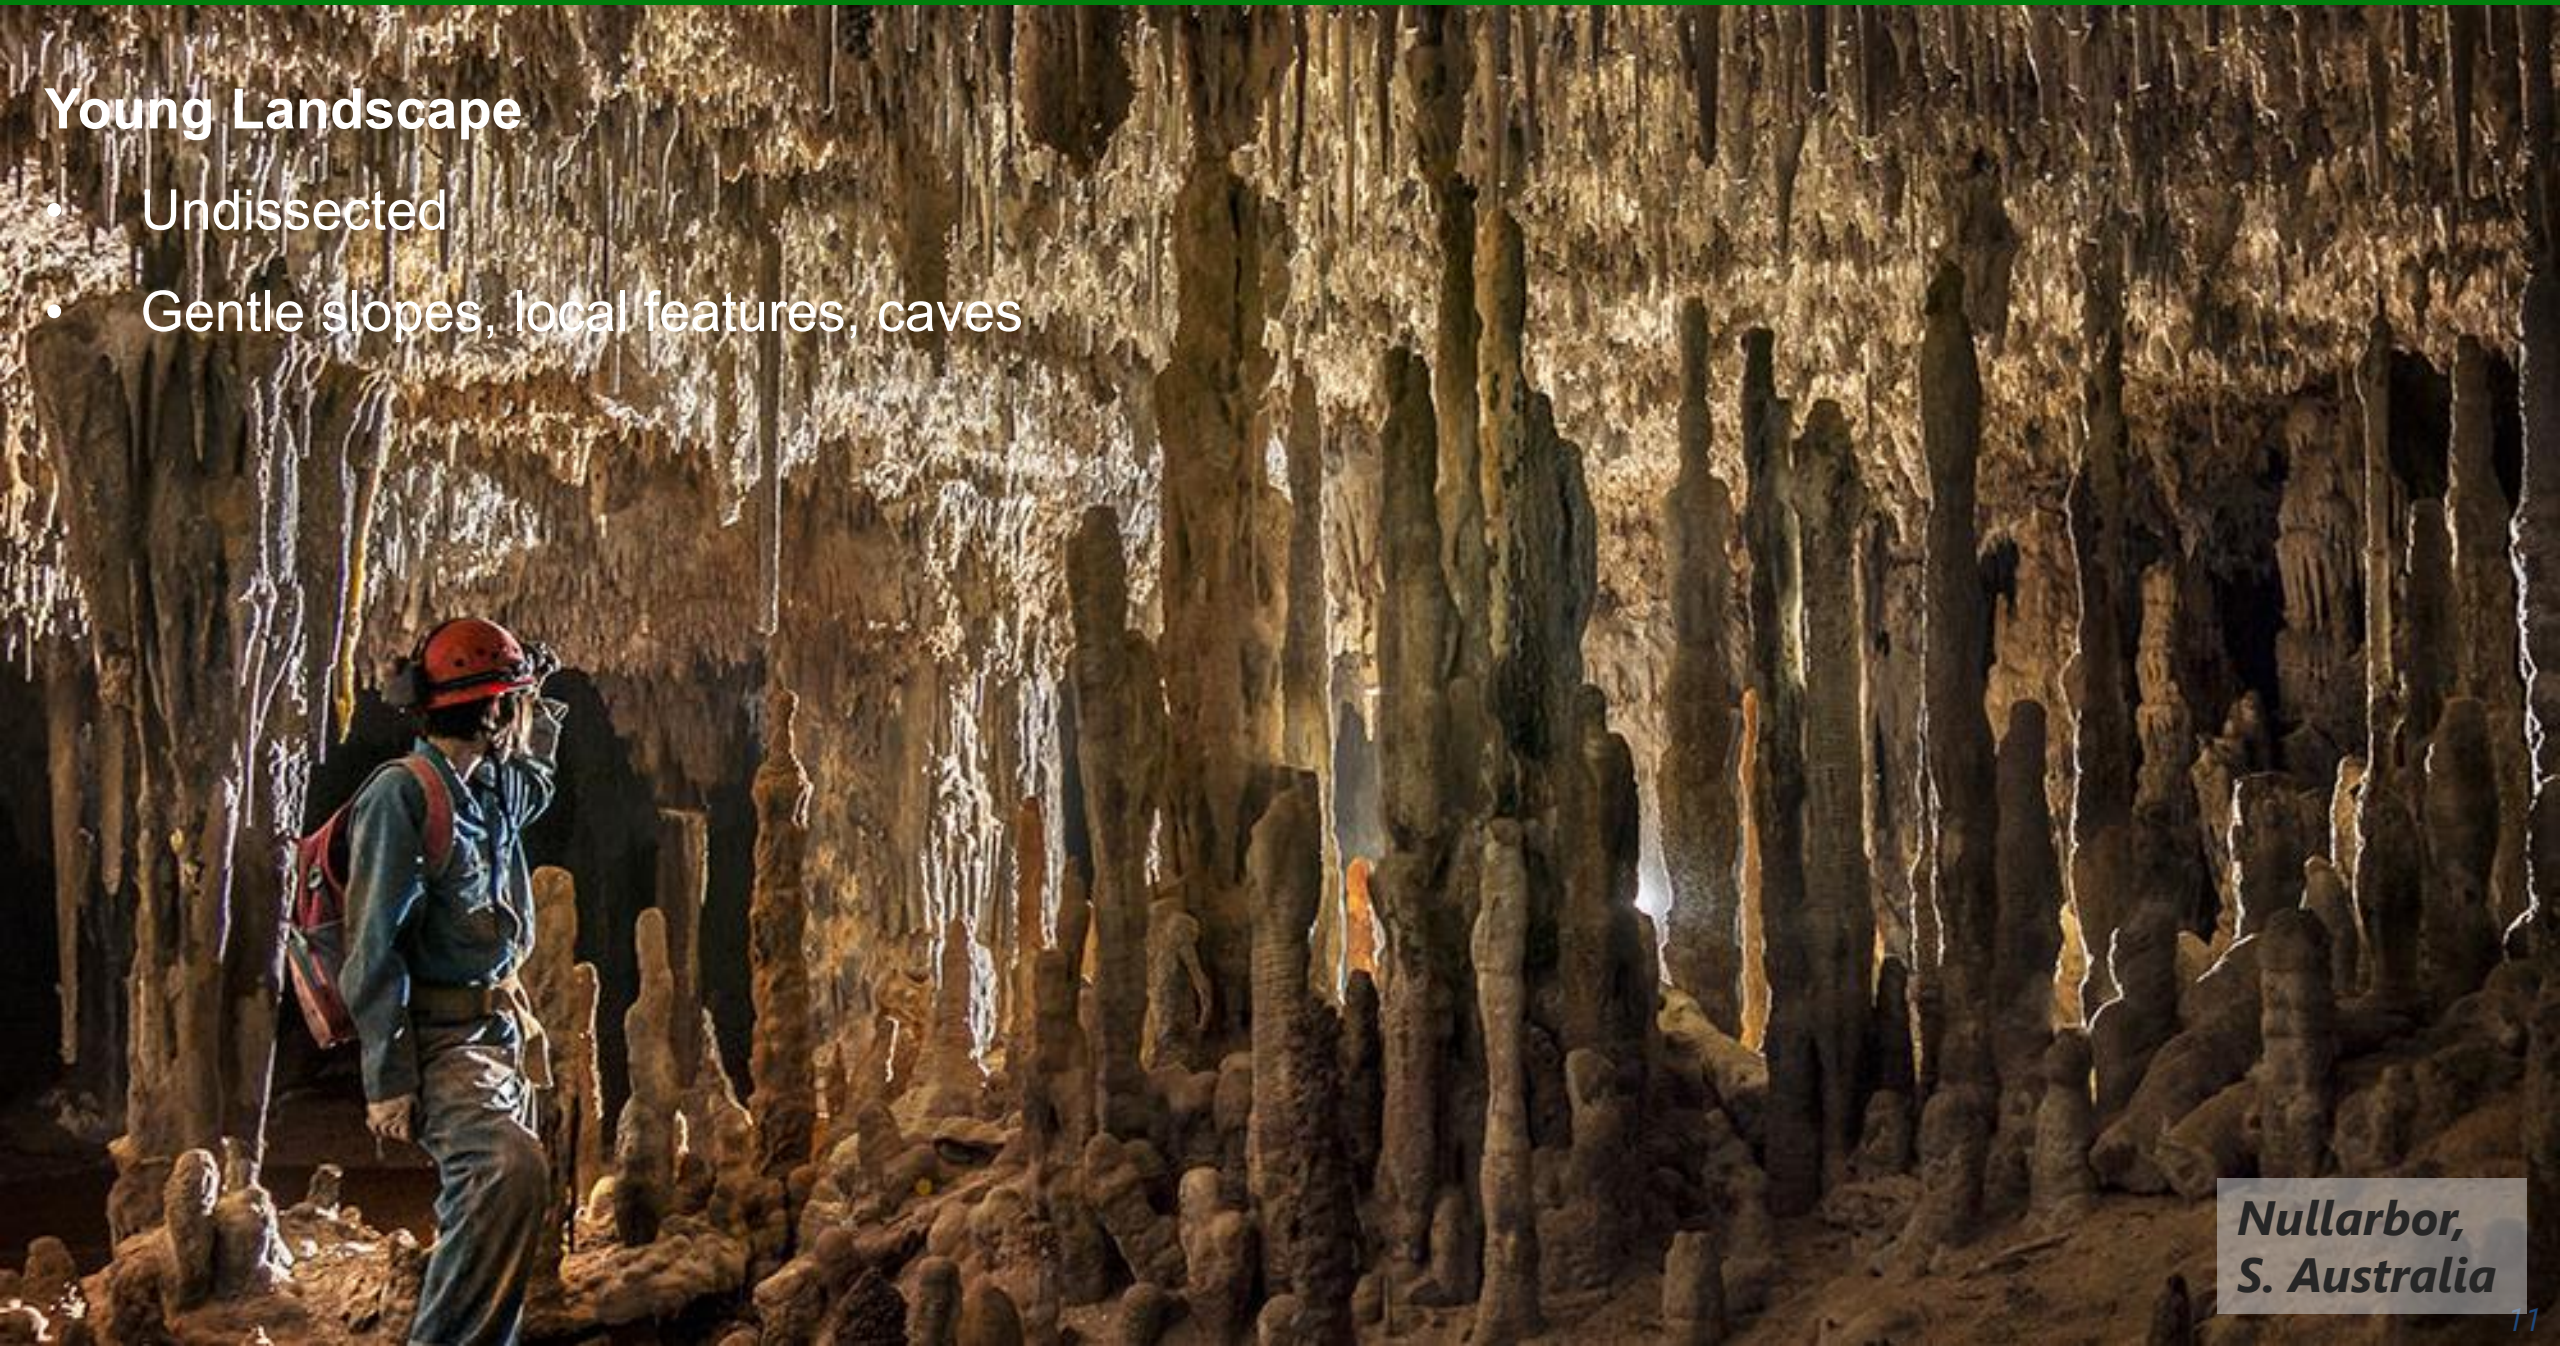

***Holme Fell,
Cumbria***

Young Landscape

- Undissected
- Gentle slopes, local features, caves

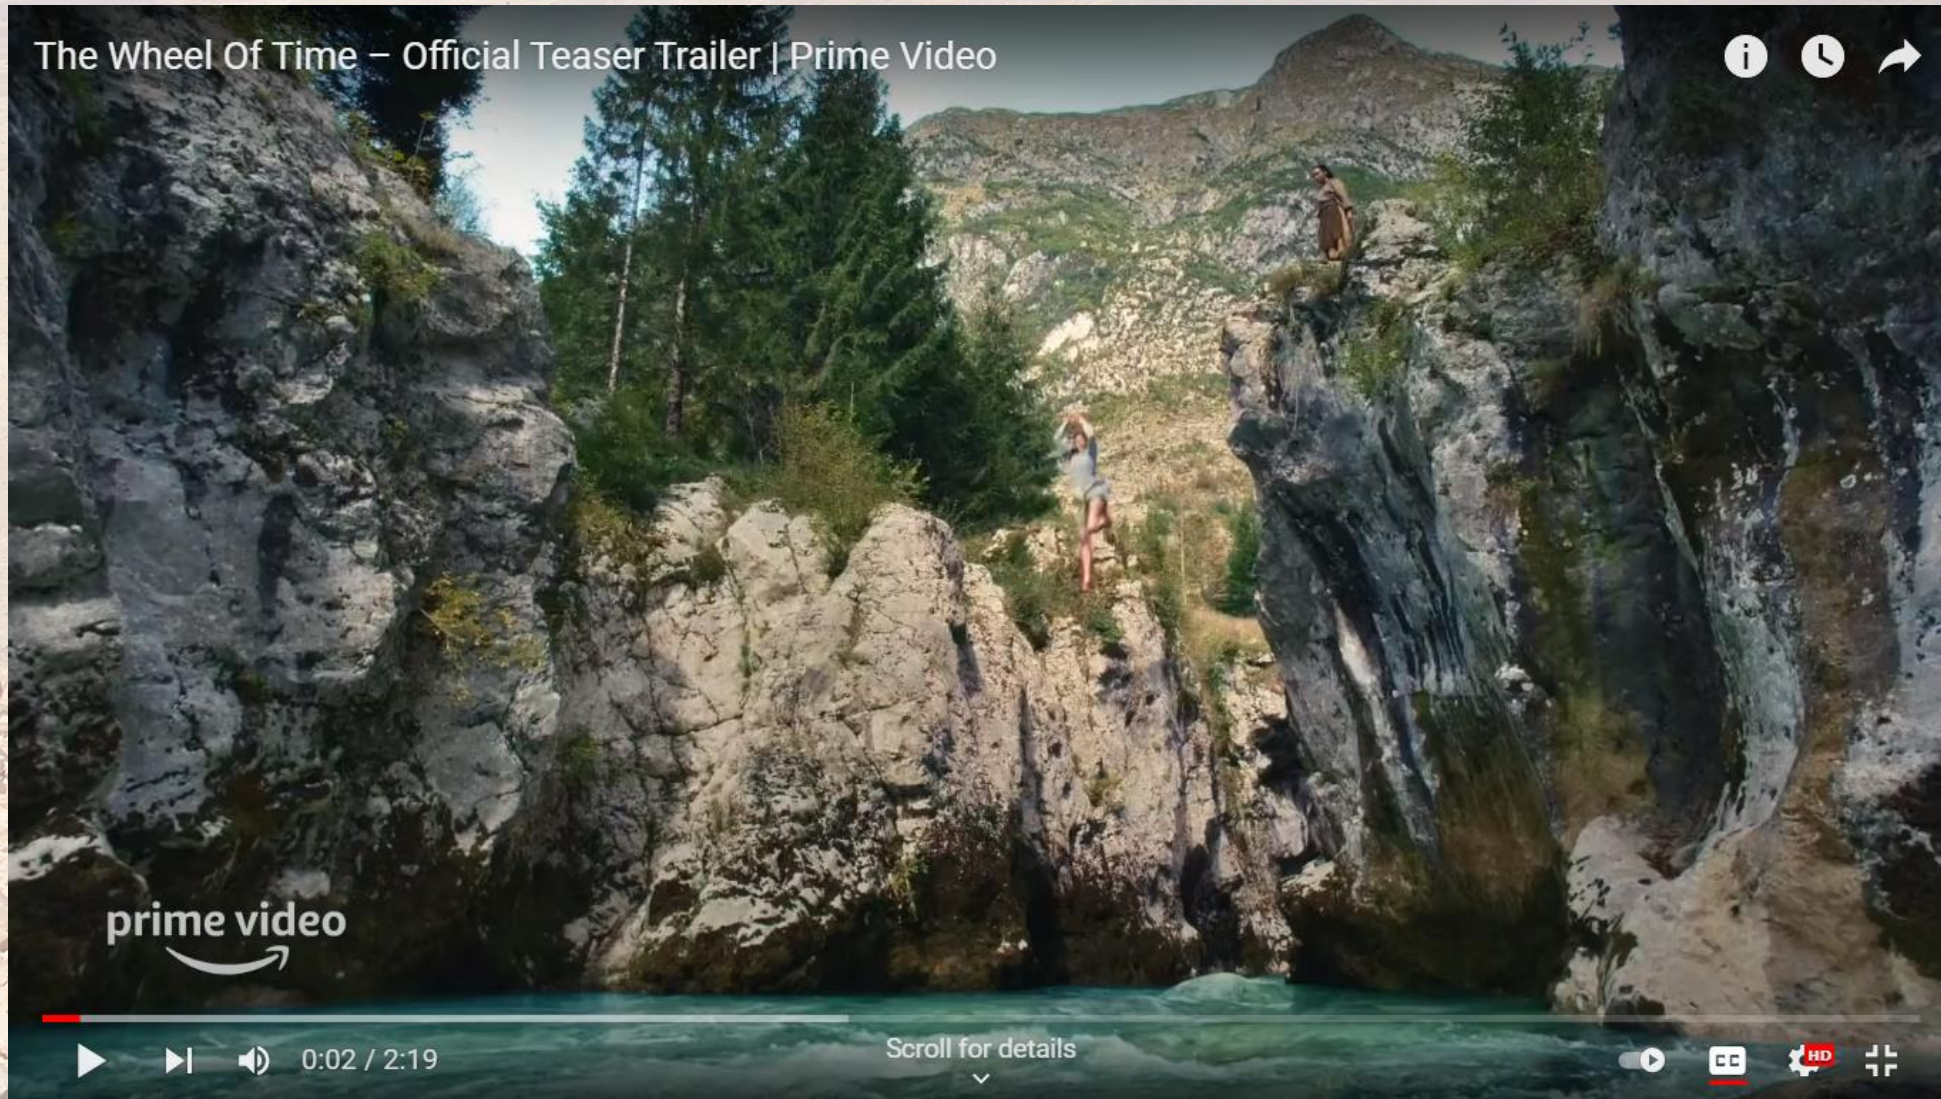

**Nullarbor,
S. Australia**

Middle age

- Partially dissected

Soca, Slovenia

Middle age

- Partially dissected
- Steep slopes

**Wulong,
China**

Middle age

- Partially dissected
- Steep slopes

Middle age

- Partially dissected
- Steep slopes

Middle age

- Partially dissected
- Steep slopes

Middle age

- Partially dissected
- Steep slopes

Quercy,
France

Middle age

- Partially dissected
- Steep slopes

**Shilin,
Yunnan, China**

Middle age

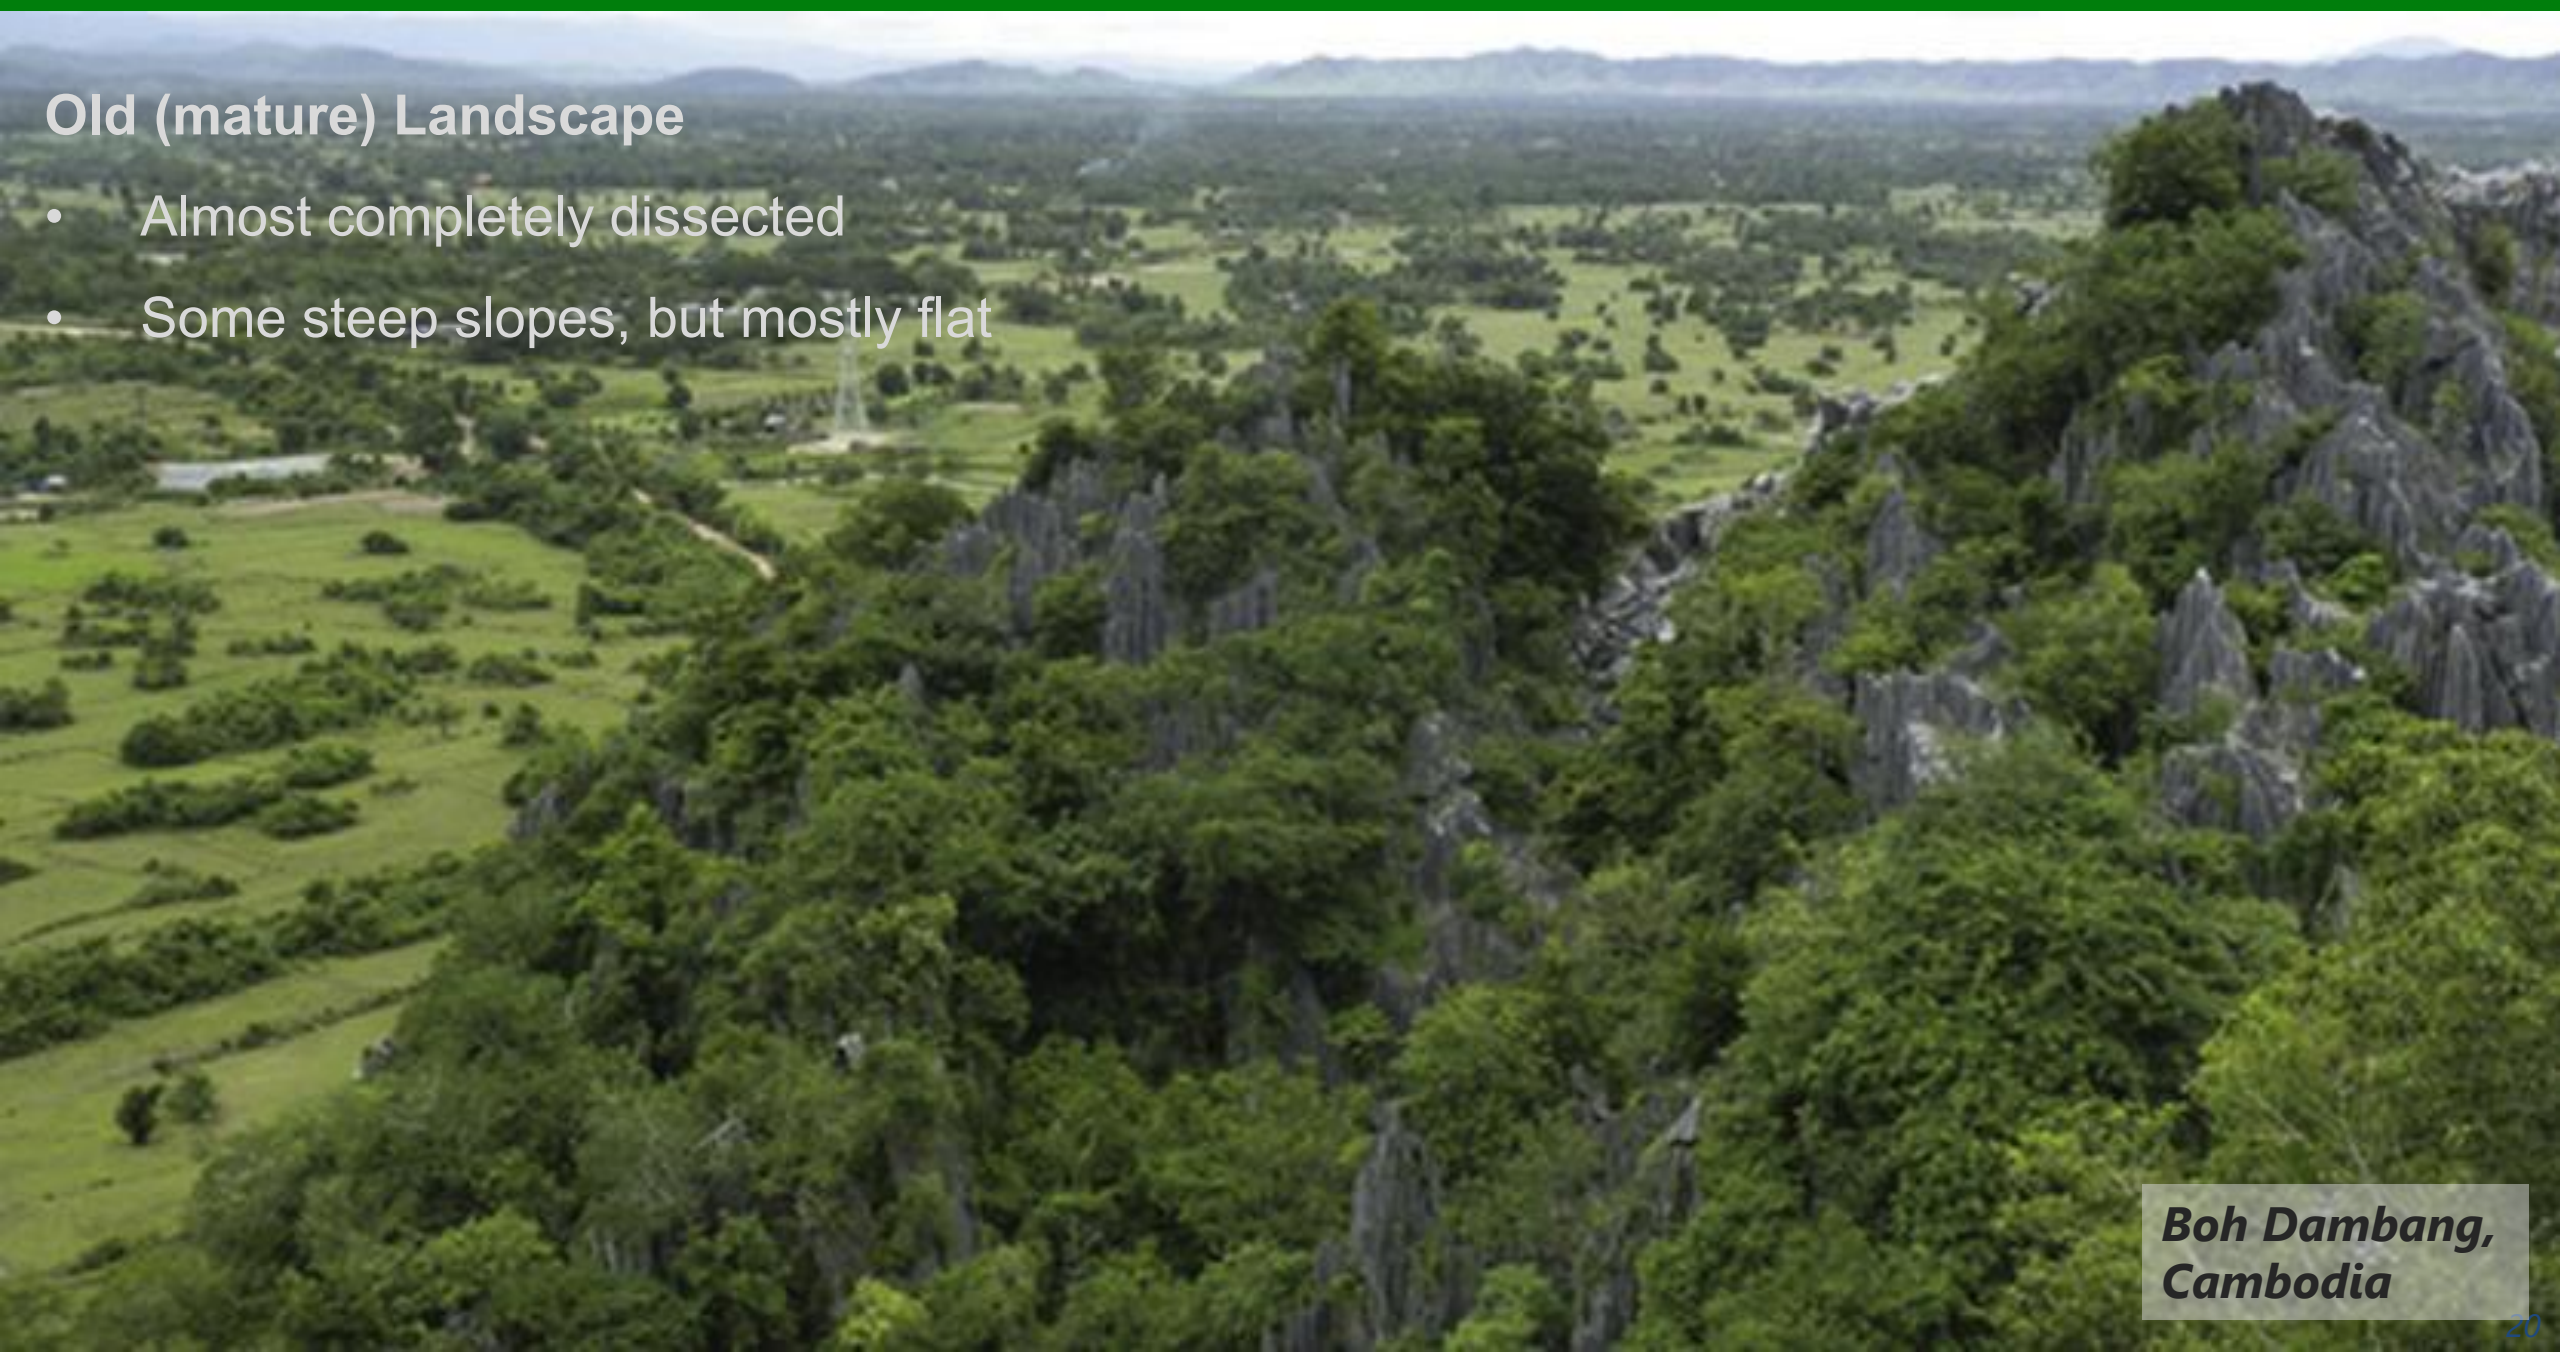

- Partially dissected
- Steep slopes

*Shilin,
Yunnan, China*

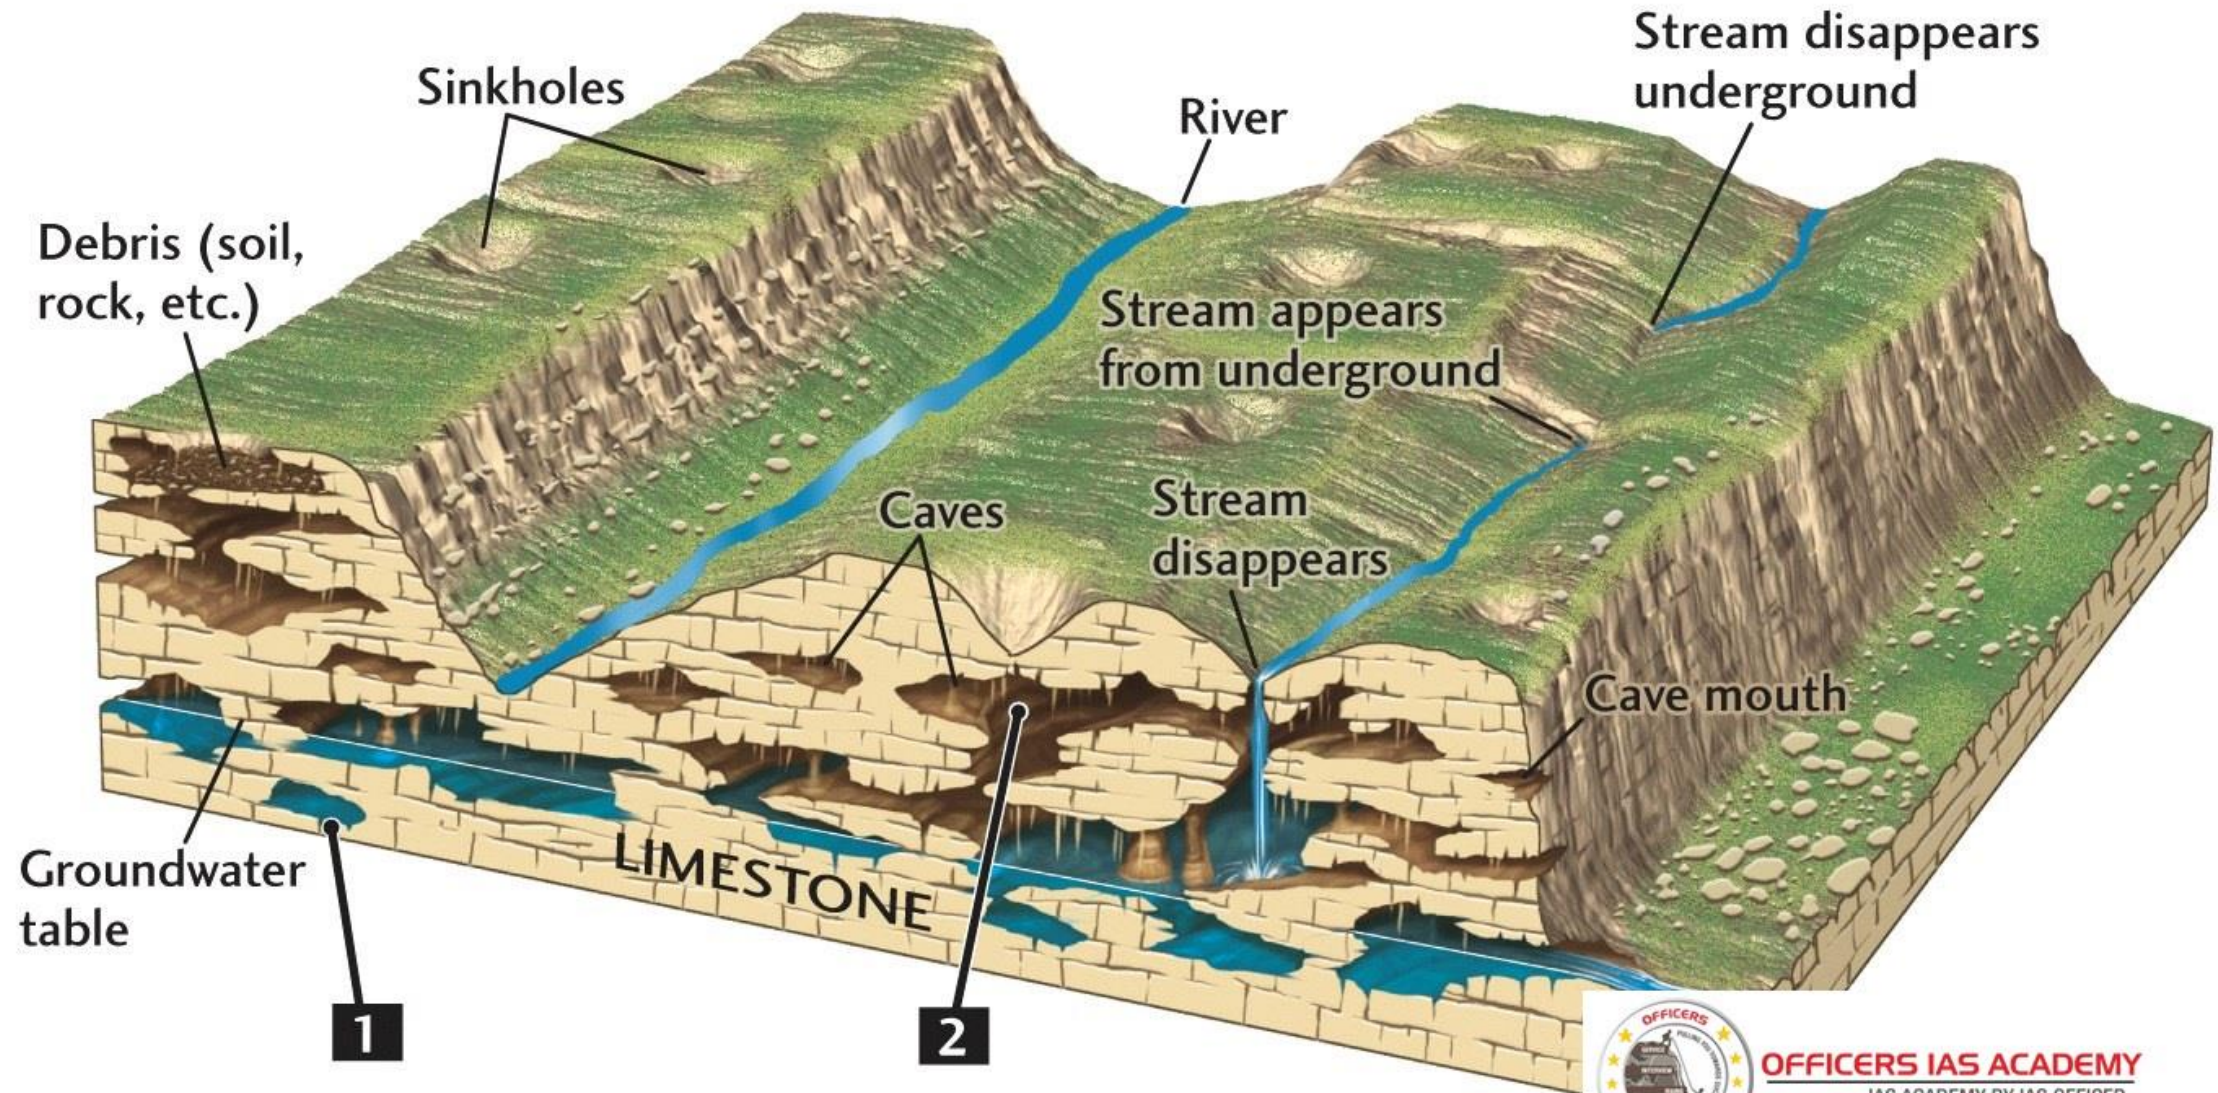

Old (mature) Landscape

- Almost completely dissected
- Some steep slopes, but mostly flat

***Boh Dambang,
Cambodia***

How do karst landscapes form?

Turloughs
